Progress Notes

03/10 17:00	Admission Note	Ginta C. Draugelis, RN
	Pt A&Ox0. HOH. Son at bedside; transferred from cardiac monitoring. Patient oriented to room, call bell and unit. IV infusing per orders. Will continue to monitor.	
19:05	Case Mgmt-Initial Note	Kyle L. Jossi, RN/CM
	Problem: Potential Need for Post Acute Care ER CASE MANAGEMENT INITIAL NOTE Met with patient's son, Alexander Neustadter (301-649-9658, w 202-260-2454) Pt brought to ER via 911 accompanied by family. He is currently not verbally responsive. Son was reluctant to have him admitted, wanted to care for him at home. Pt lives w/ son, has a caregiver all the time. Uses a cane to get around. No steps. Able to perform ADLs independently with direction. Family and caregiver provide meals and meds. Son plans return to same arrangement following discharge. Discharge planning needs uncertain at this time, CM to follow.	
22:07	Transfer Note	Carol M. Smith, RN
	Problem: Potential Need for Post Acute Care Pt. transferred to rm 61072 per MD. request. No acute distress noted. Report given to nurse. Abdominal x-ray cancelled per MD. request.
